A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 6/10/2008 has been entered.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bright et al. (5,752,345). As shown in Figure 9, Bright et al. (5,752,345) disclose a weather strip (12) in combination with a motor vehicle (see figure 1) comprising a steel metal carrier (22) having a U-shaped cross-section (sealing flanges each side of the weather strip) having a first region having a first flexibility along a longitudinal length (see figure below) and a second region having a second flexibility along the longitudinal length (see figure below), and an elastomeric material (14) disposed about the metal carrier (22) and including a tubular/hollow sealing feature (16) extending from the weather strip (12). Bright et al. (5,752,345) further disclose the first region having a plurality of apertures disposed generally centrally along the carrier (22). Bright et al.

Art Unit: 3634

(5,752,345) still further disclose the second region having a plurality of slits (see figure below). Bright et al. (7,752,345) still further disclose the first region and second region to have distinct flexibilities (column 4, lines 50-60).

Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.
